## PROFESSIONAL SCIENCE MASTER'S (PSM) DEGREE IN ENGINEERING MANAGEMENT

**ENHANCE YOUR MANAGERIAL  
SKILLS AND BECOME AN  
INDUSTRY-DESIRED ENGINEERING  
PROFESSIONAL, ENROLL NOW!**

## Introducing T.I.P.'s Professional Science Master's (PSM) Degree in Engineering Management

Team leadership plays a vital role in business and working environments. Having the ability to manage work and distribute tasks in any situation is an advantage. But not everyone is born with this skill set.

For professionals in the field of engineering, further education can help you develop your hidden managerial abilities. Thus, T.I.P. gives you the country's first Professional Science Master's (PSM) Degree in Engineering Management.

This PSM program offers a great opportunity for new and experienced engineering professionals to develop and sharpen their business-handling

skills. It aims to equip engineers with both technical and managerial expertise, designed to play a key role in preparing the next generation of industry leaders.

### Why take a Professional Science Master's (PSM) Degree in Engineering Management in T.I.P.:

- It is the first and only Professional Science Master's (PSM) Degree in Engineering Management in the Philippines.
- The program offers cost-effective quality education compared to other engineering management-related graduate programs in the country.
- It was developed with the assistance of the United States Agency for International Development (USAID) Science, Technology, Research and Innovation for Development (STRIDE).
- Its curriculum was benchmarked with similar offerings of top universities such as the University of Southern California, Duke University, Johns Hopkins University, Cornell University, and Purdue University, among others.
- Courses were brought together in partnership with P.IMES Corporation, Applied Machining Corporation, and Western Digital Storage Technologies (WDST) Philippines Corporation.

#### Expect the following when enrolled in this program:

- Rigorous study in applied science and mathematics
- Varied coursework in management, policy, law, and related fields
- Development of industry-desired technical and non-technical skills
- Opportunity to apply business, organizational, and technical knowledge through a capstone project relevant to the industry

#### As a professional, you will be better equipped to:

- Integrate engineering and technical expertise with business acumen to solve difficult problems brought about by the increasing complexities of technology and business processes
- Lead the day-to-day operations of an organization
